

Homework - Due May 27

Read Cavoukian and Hamilton chapters 3, 4, 5, 6

Prepare the following for class discussion and to turn in:

1. Find a privacy survey (a few are listed on these slides). Summarize the survey results and compare and contrast them to the study discussed in class. Comment on how your preferences and experiences differ or agree with those reported in both the online and the survey discussed in class. [2 pages max]
2. Observe some instance of authentication in your daily life? Briefly describe the process and comment on the privacy implications of how it is performed. Consider if this process could be done with more privacy? Why or why not? [1 page max]
3. How many wireless devices do you use every day? Briefly explain the privacy implications of each one. If you do not use any, explain how the introduction of several in your life would effect how your daily activities would be less private? [1 page max]
